

Generative Zoo

Supplementary Material

A. Additional GenZoo Samples

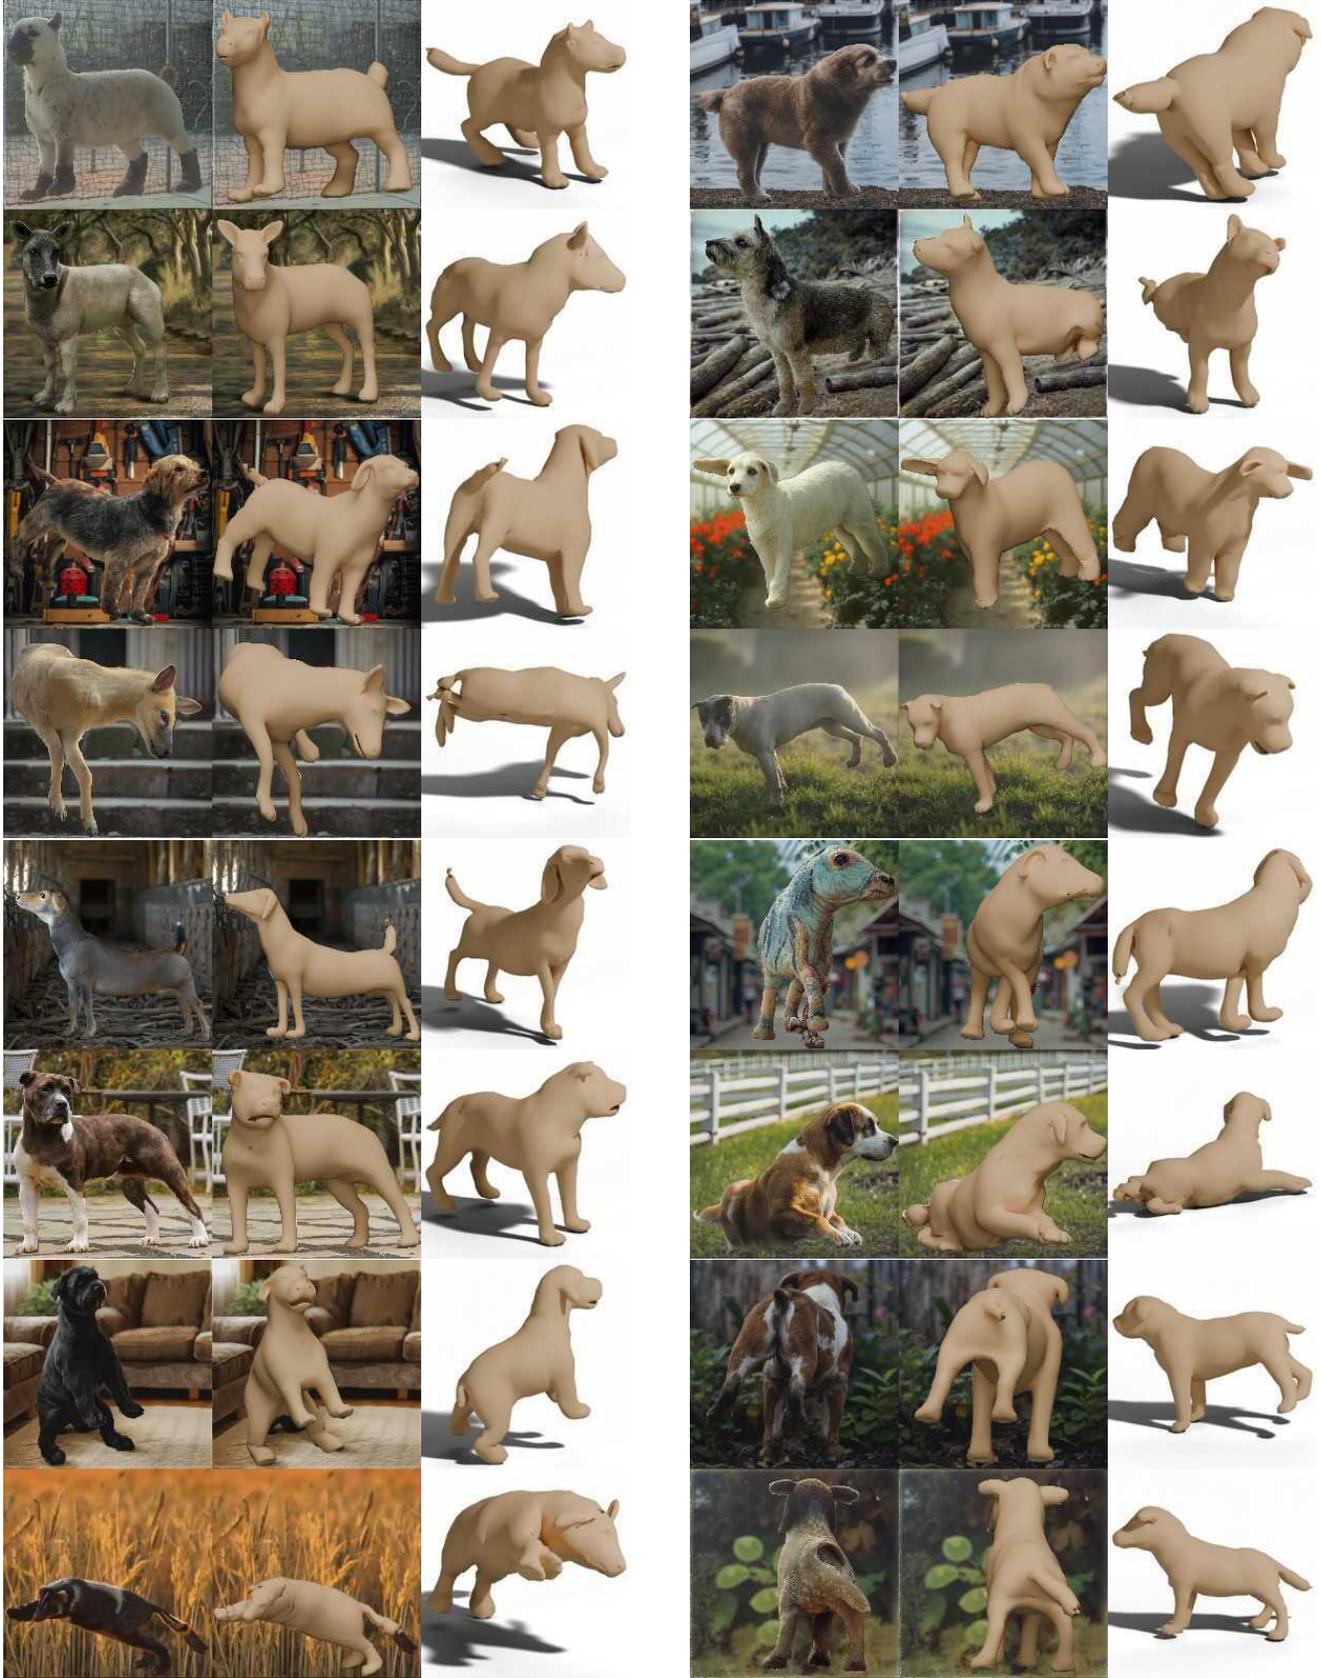

We provide next, 250 random dataset samples. Samples are presented without the application of any filtering. Below, see also Appendix B for comprehensive Animal3D reconstructions.

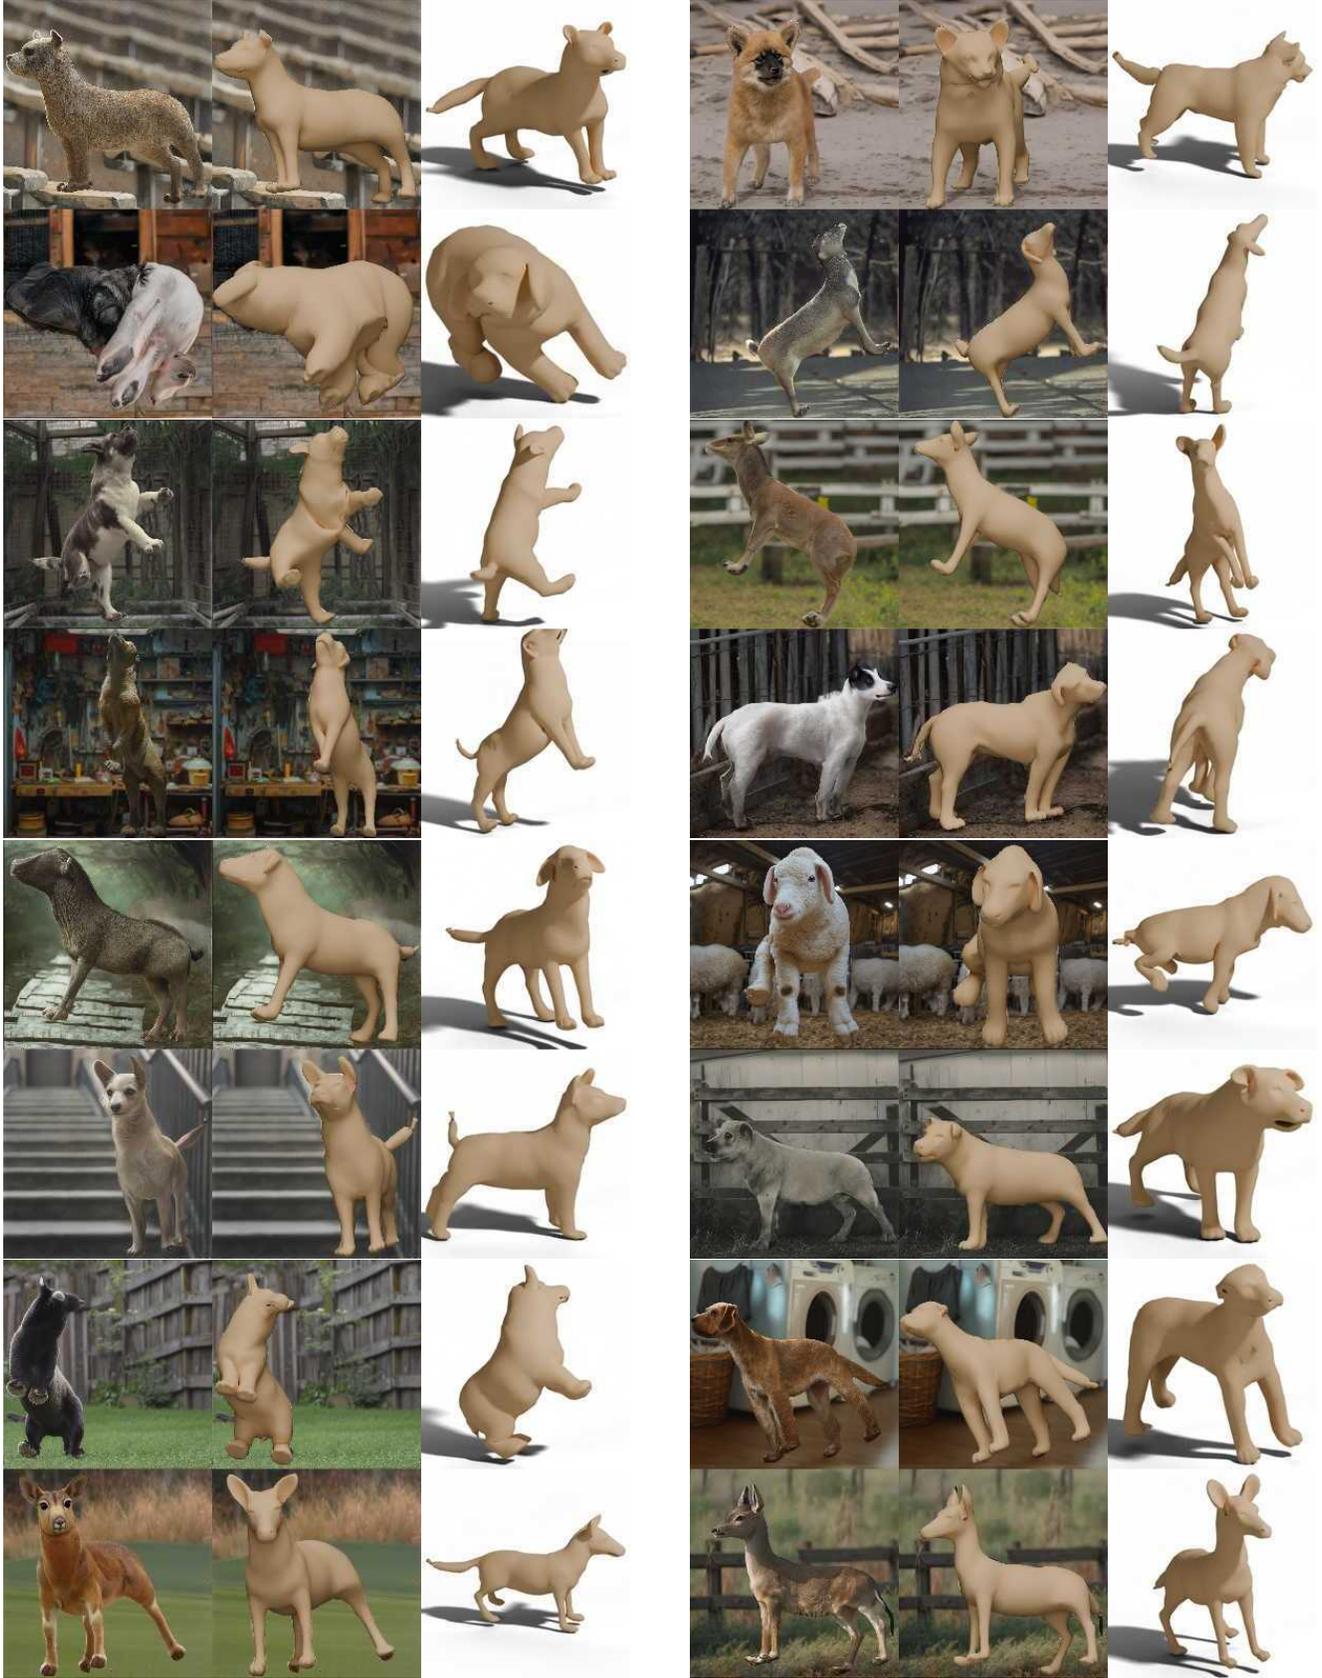

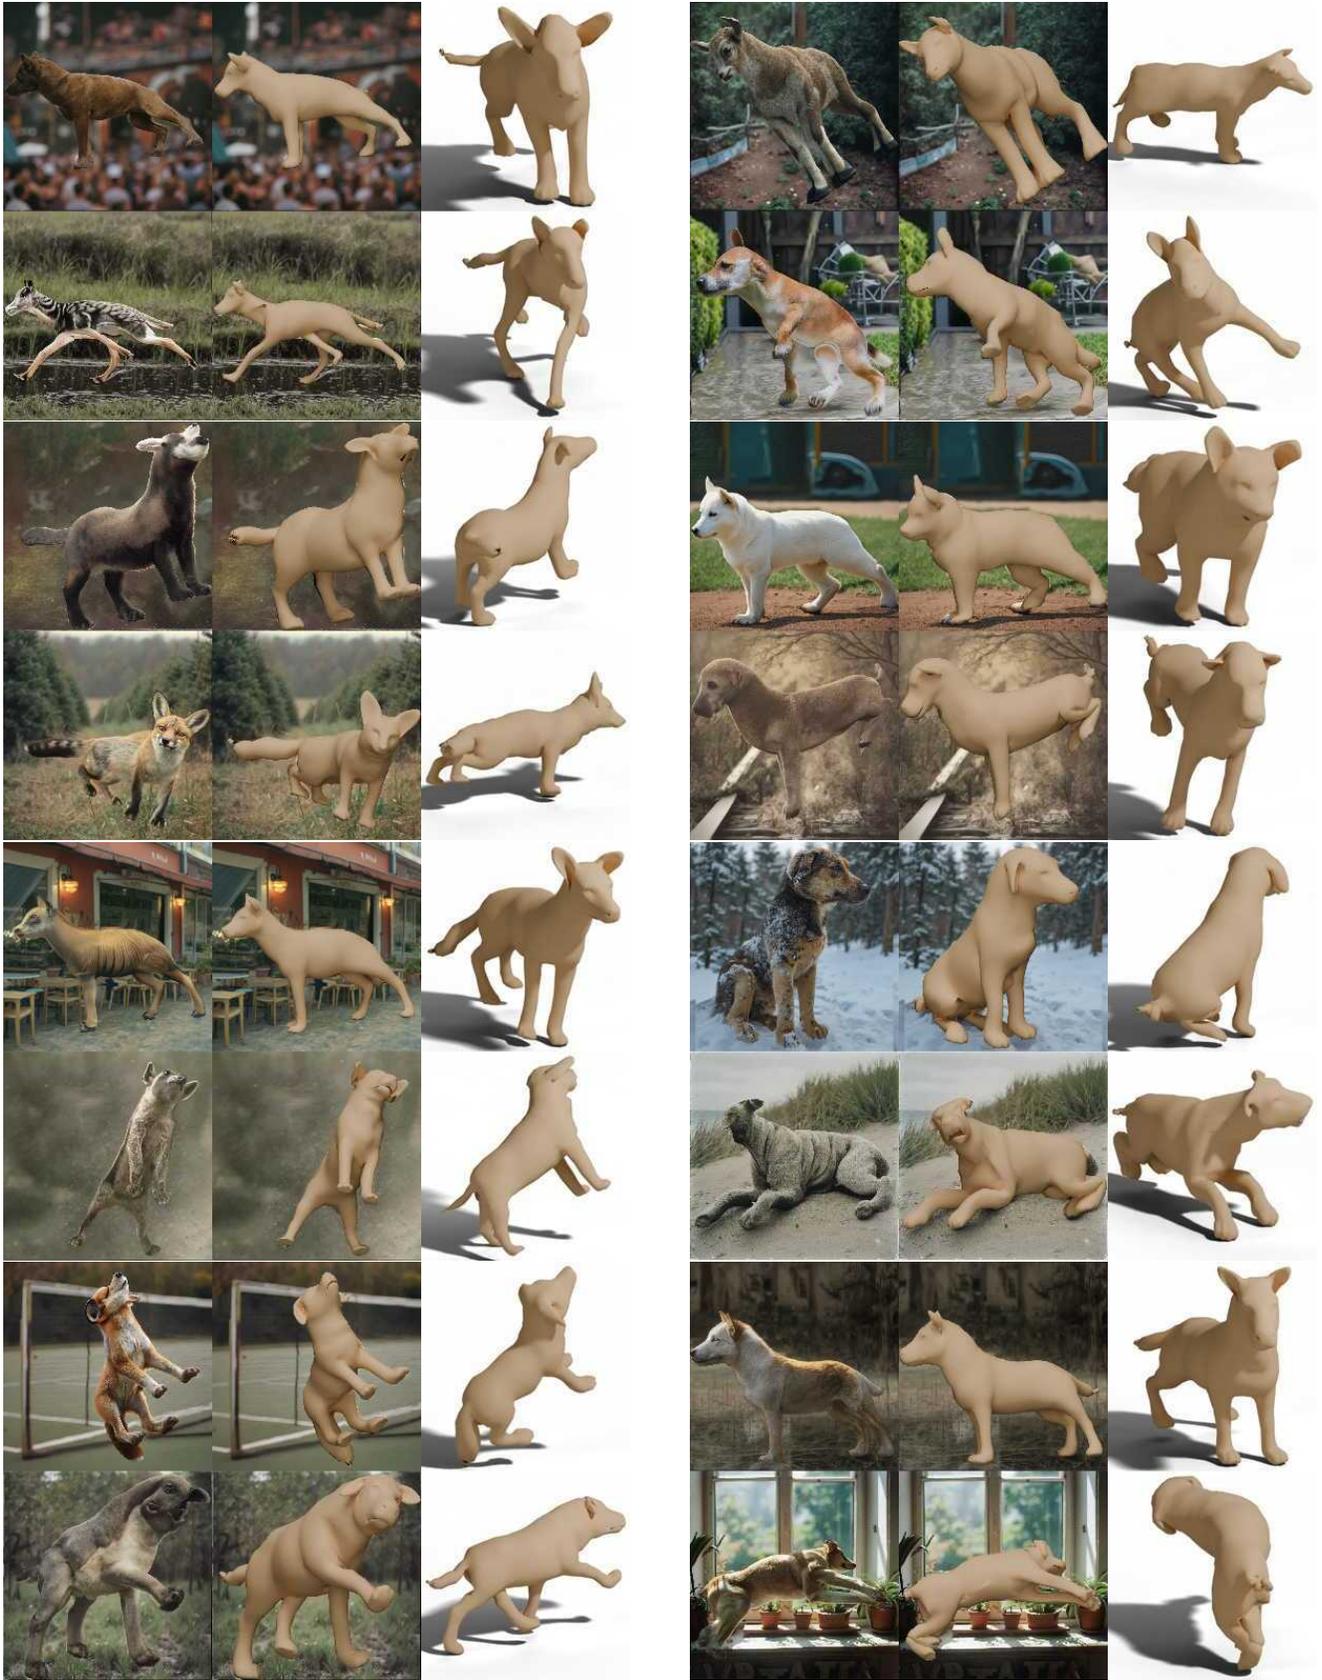

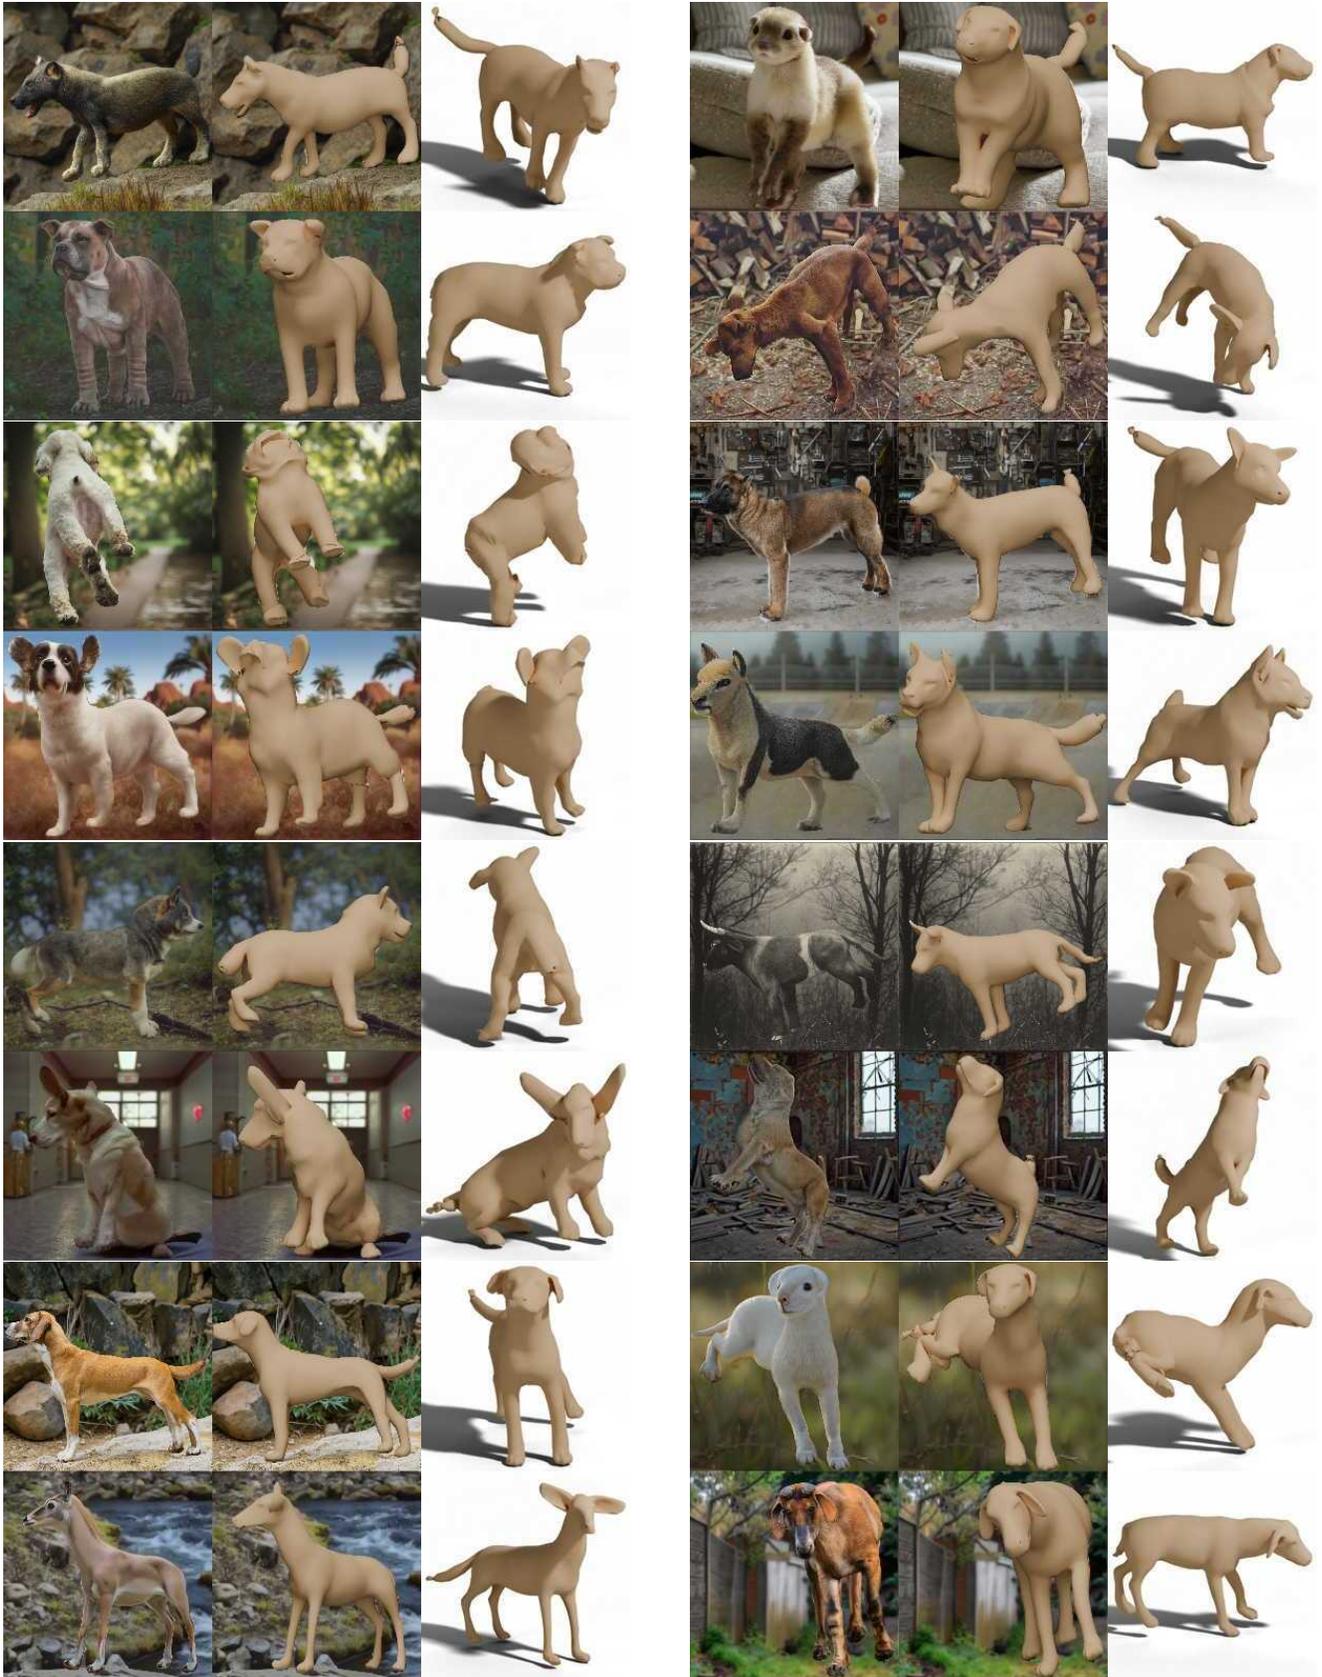

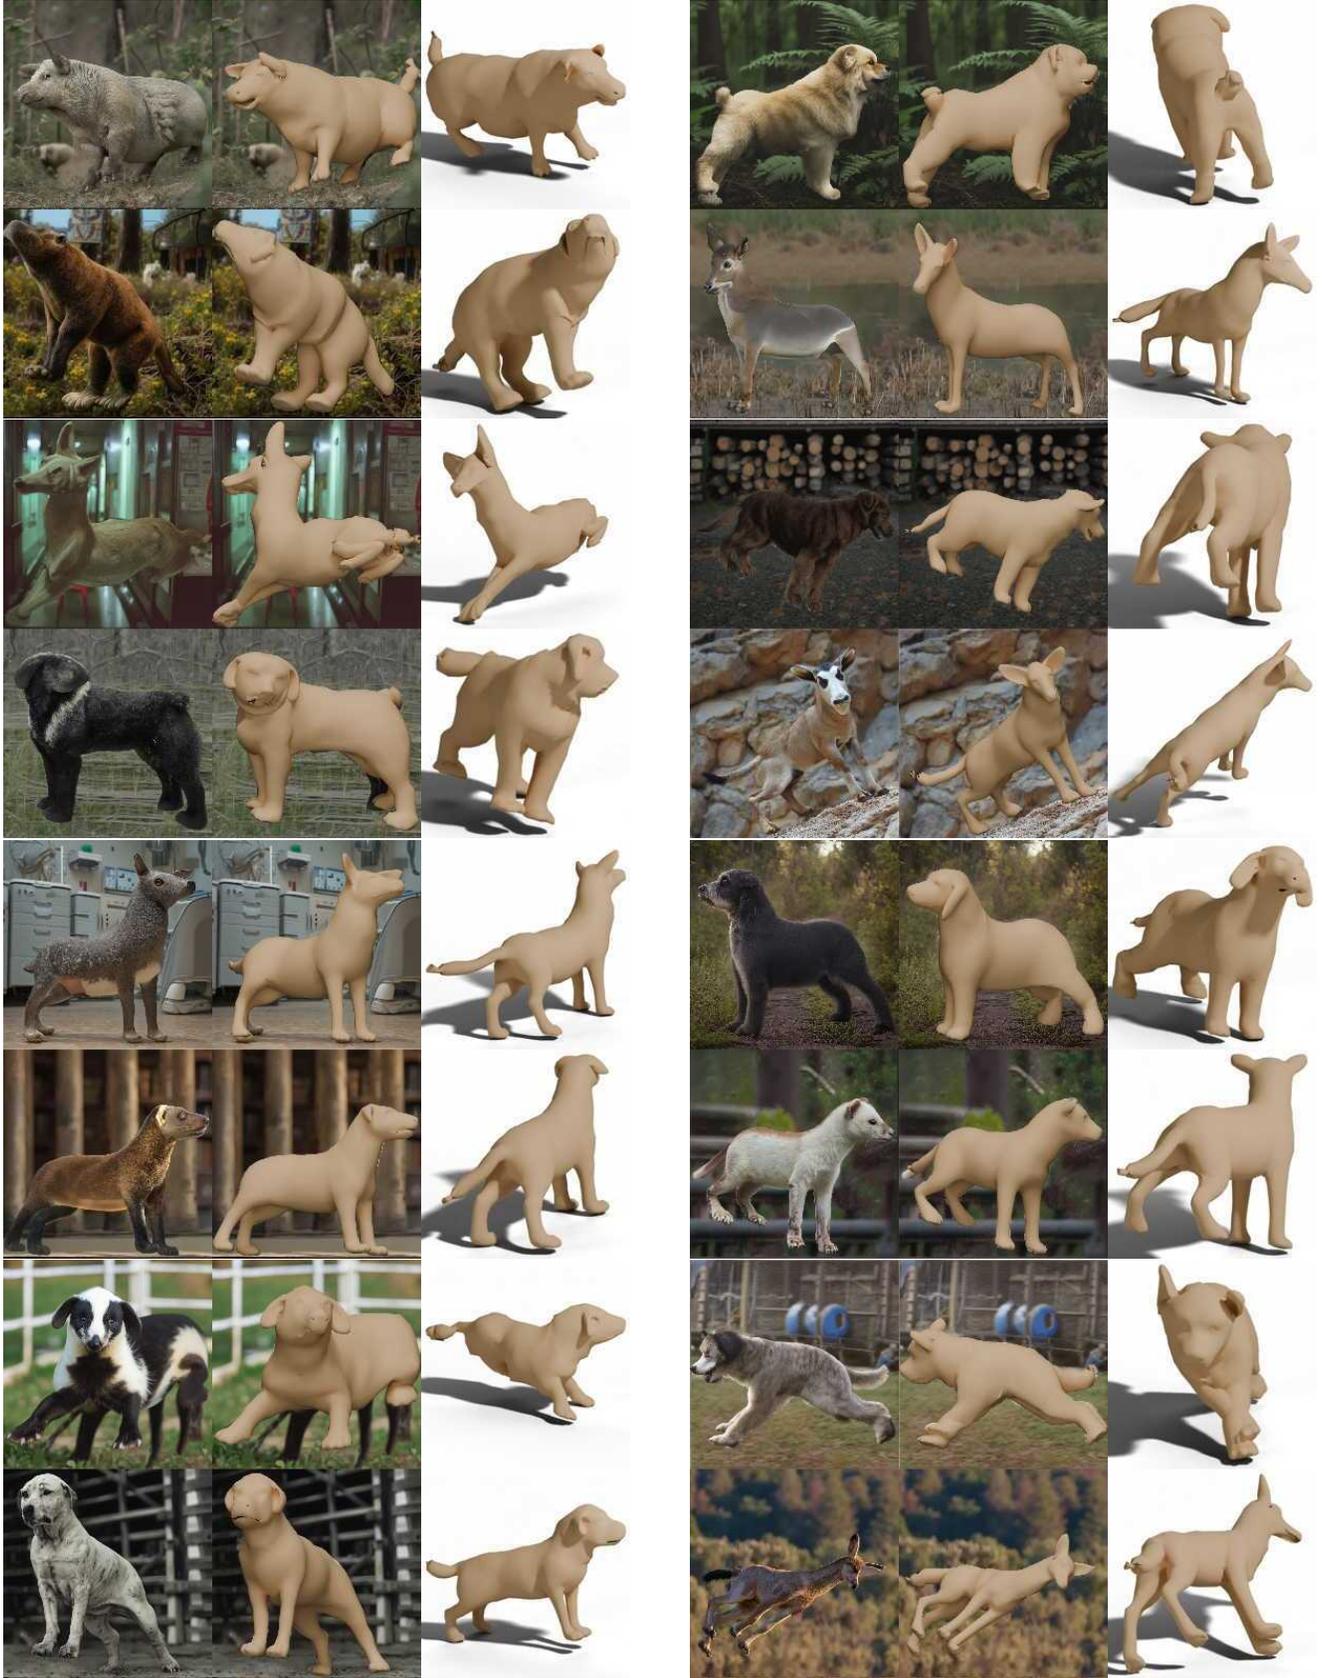

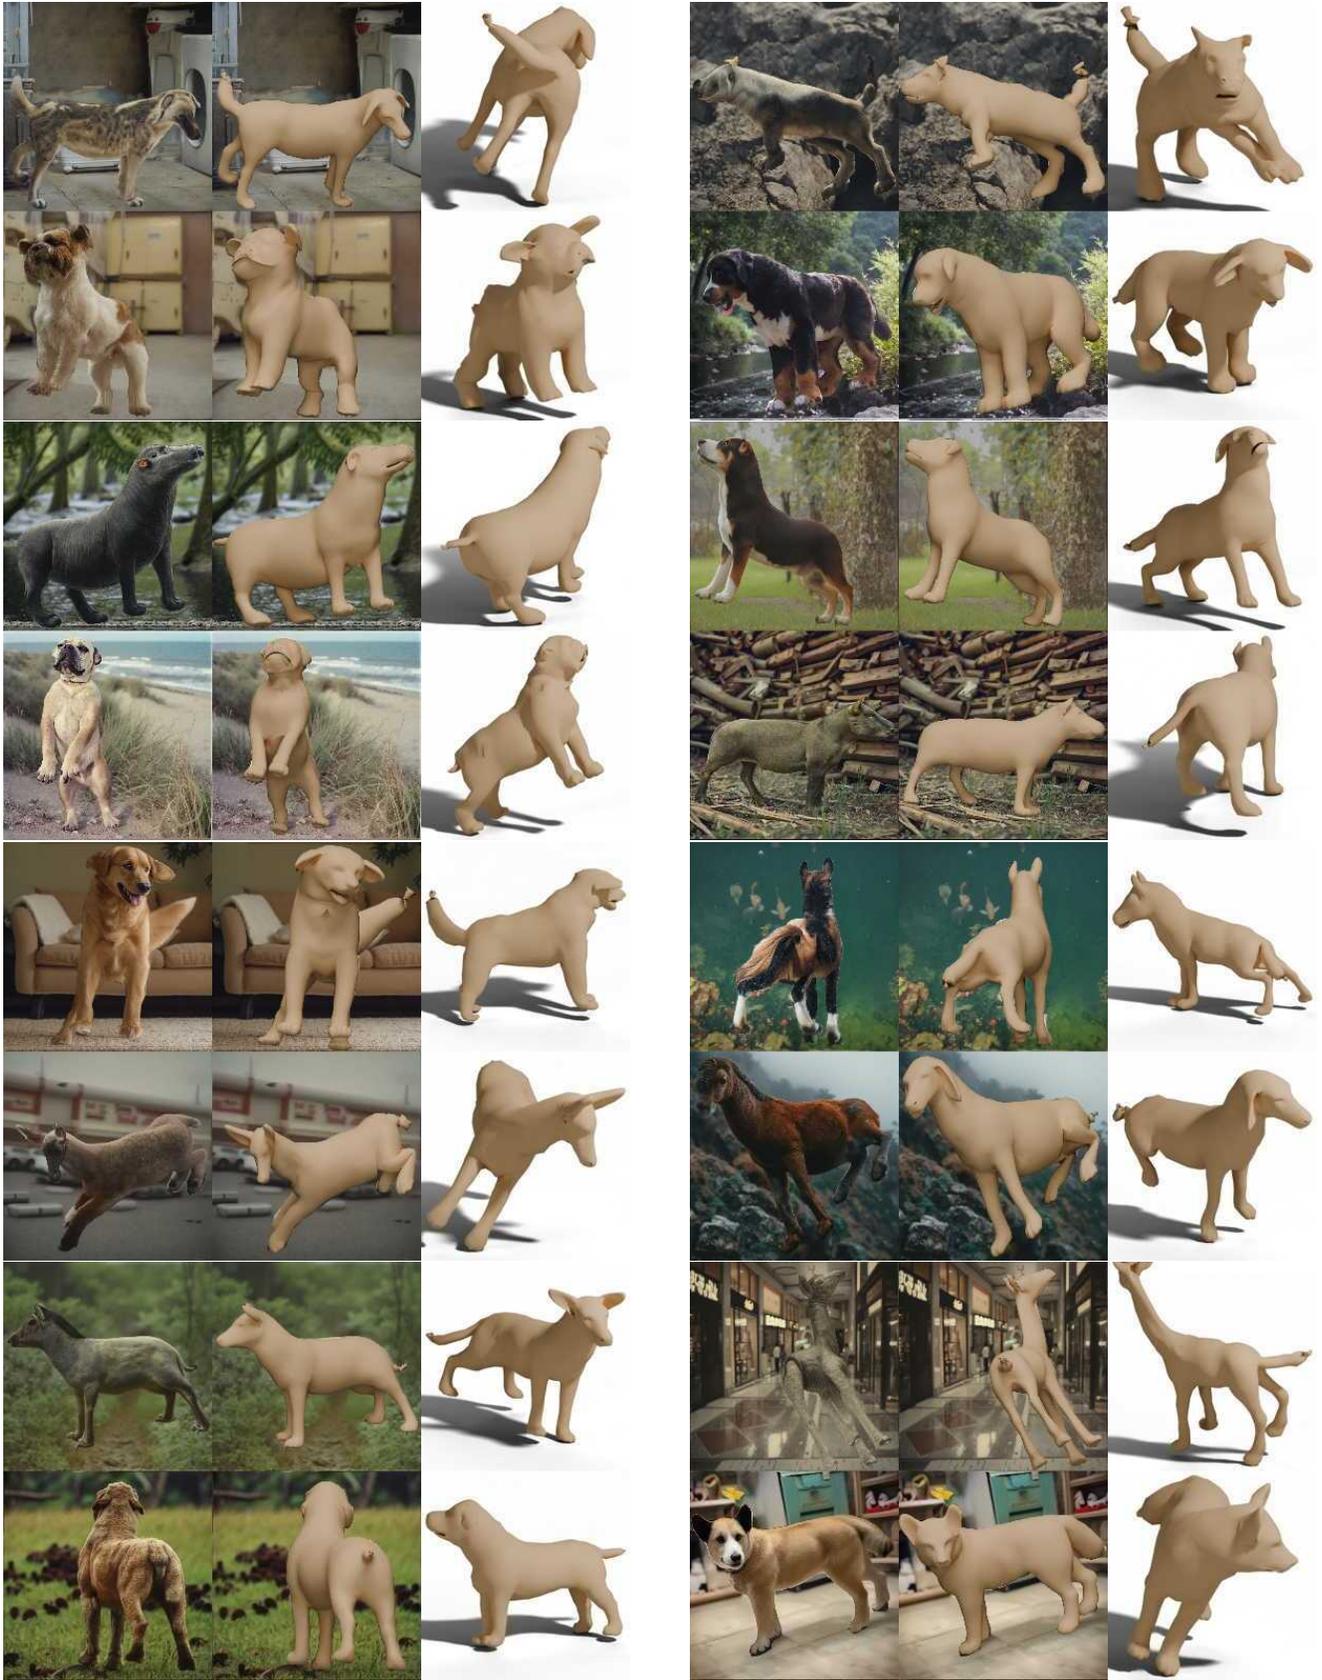

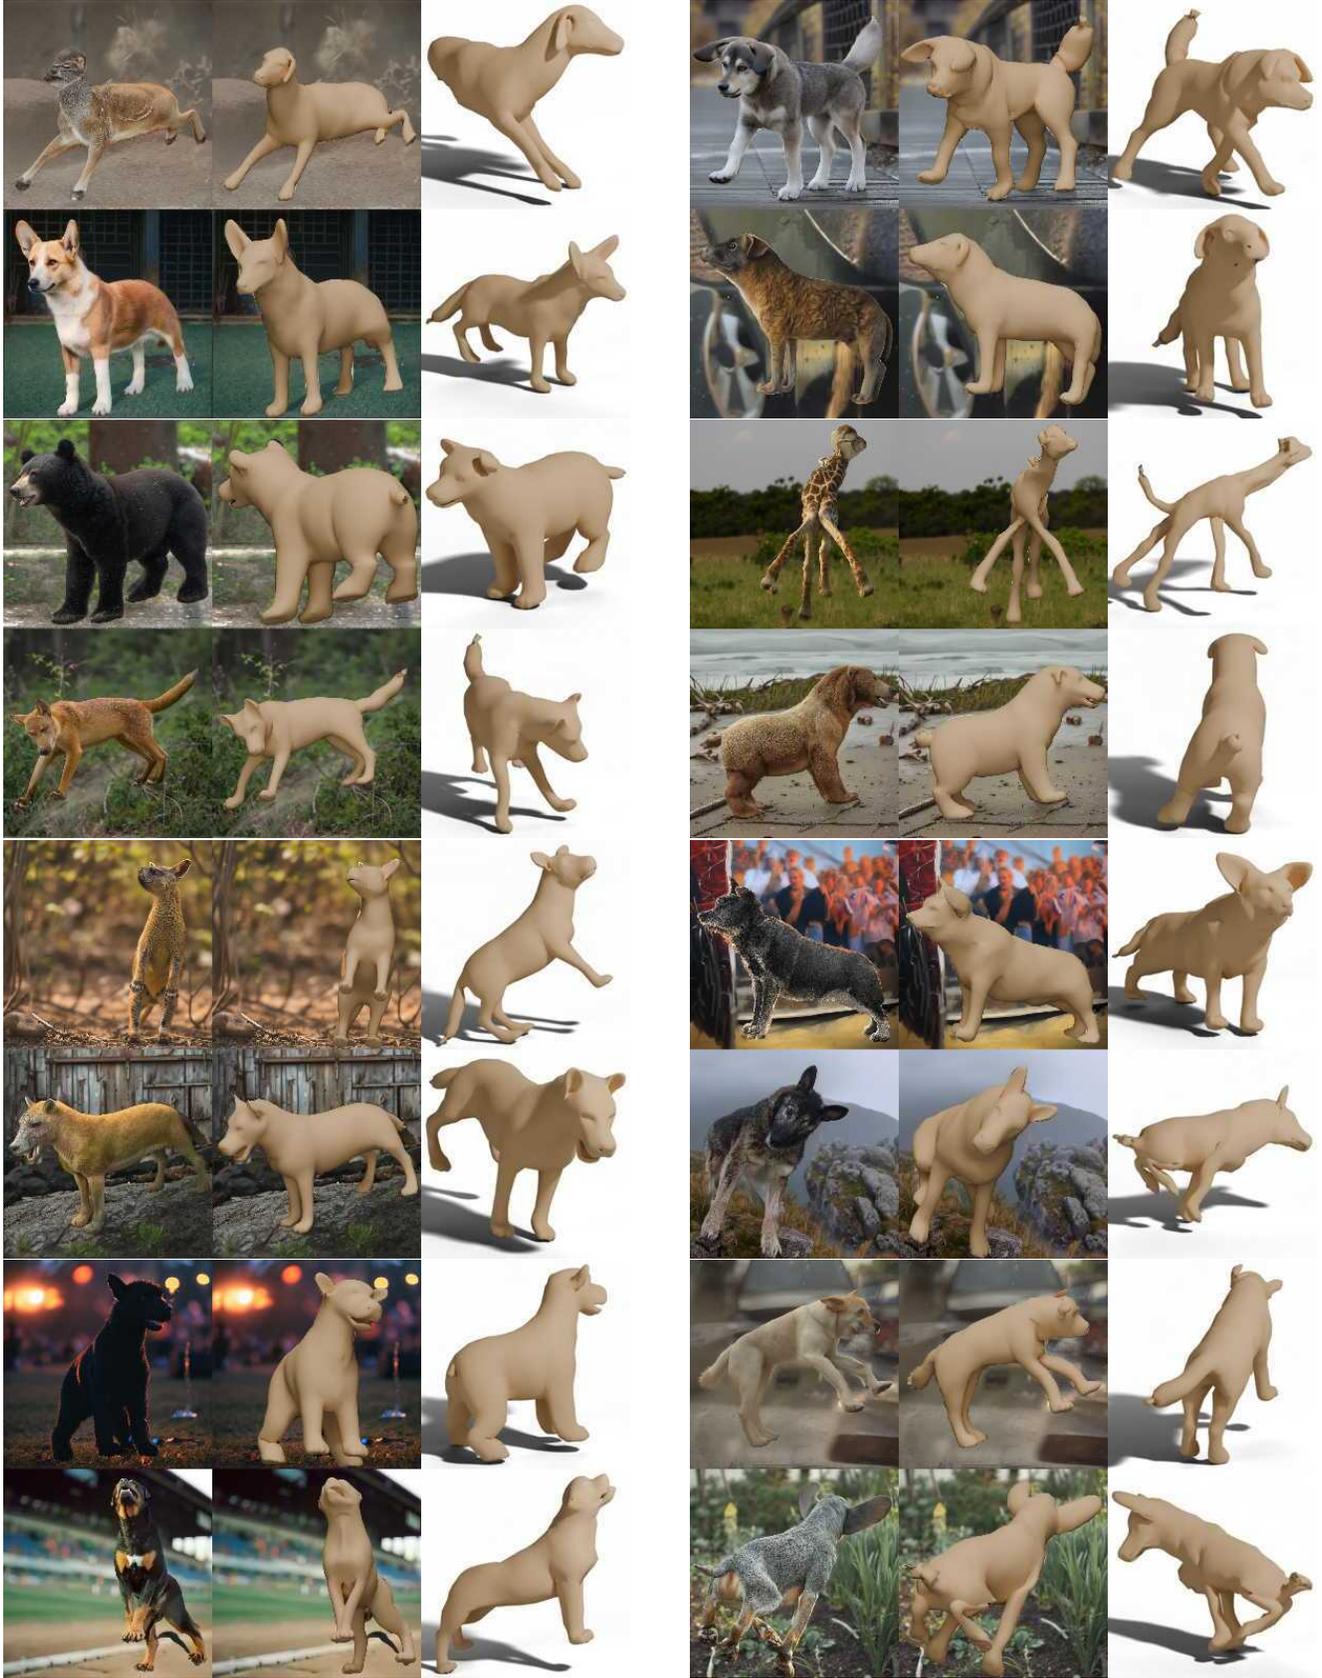

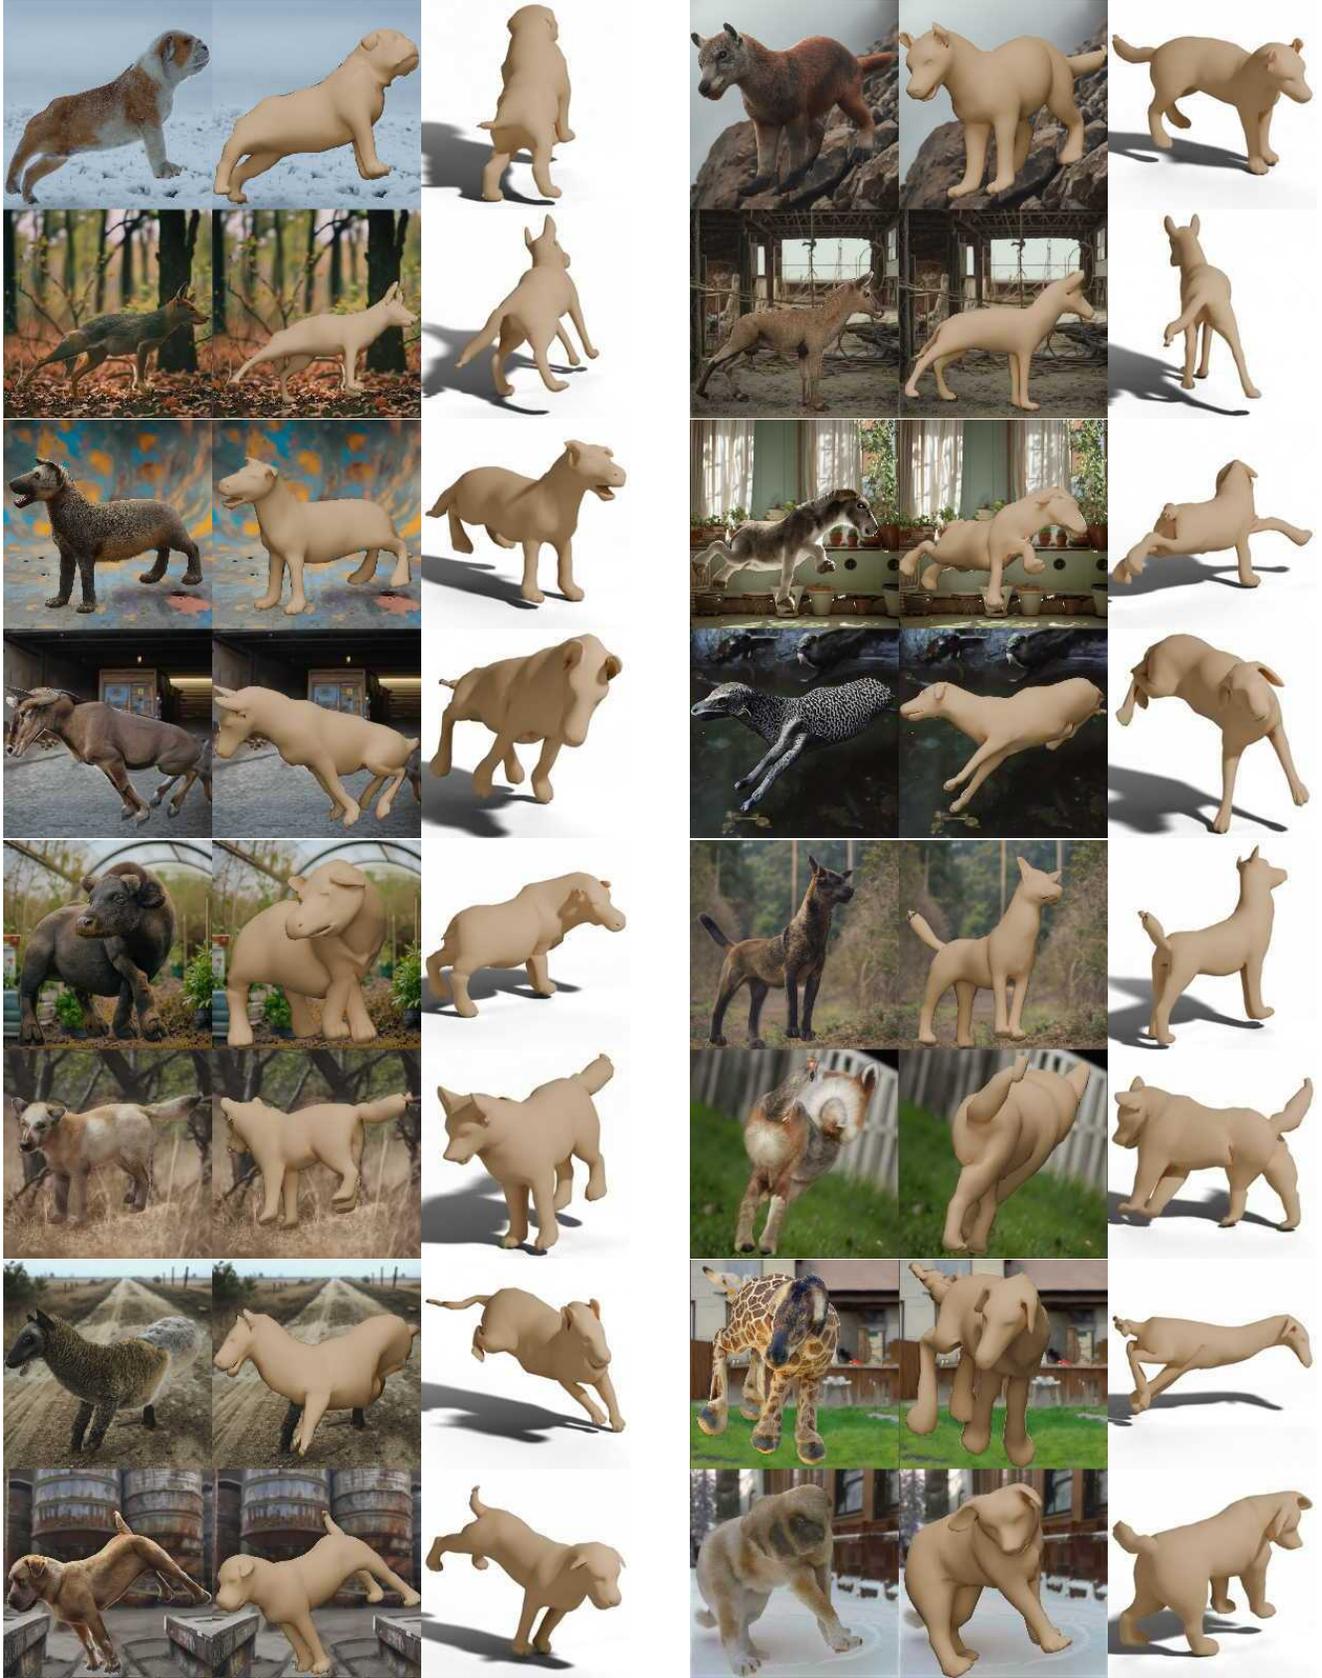

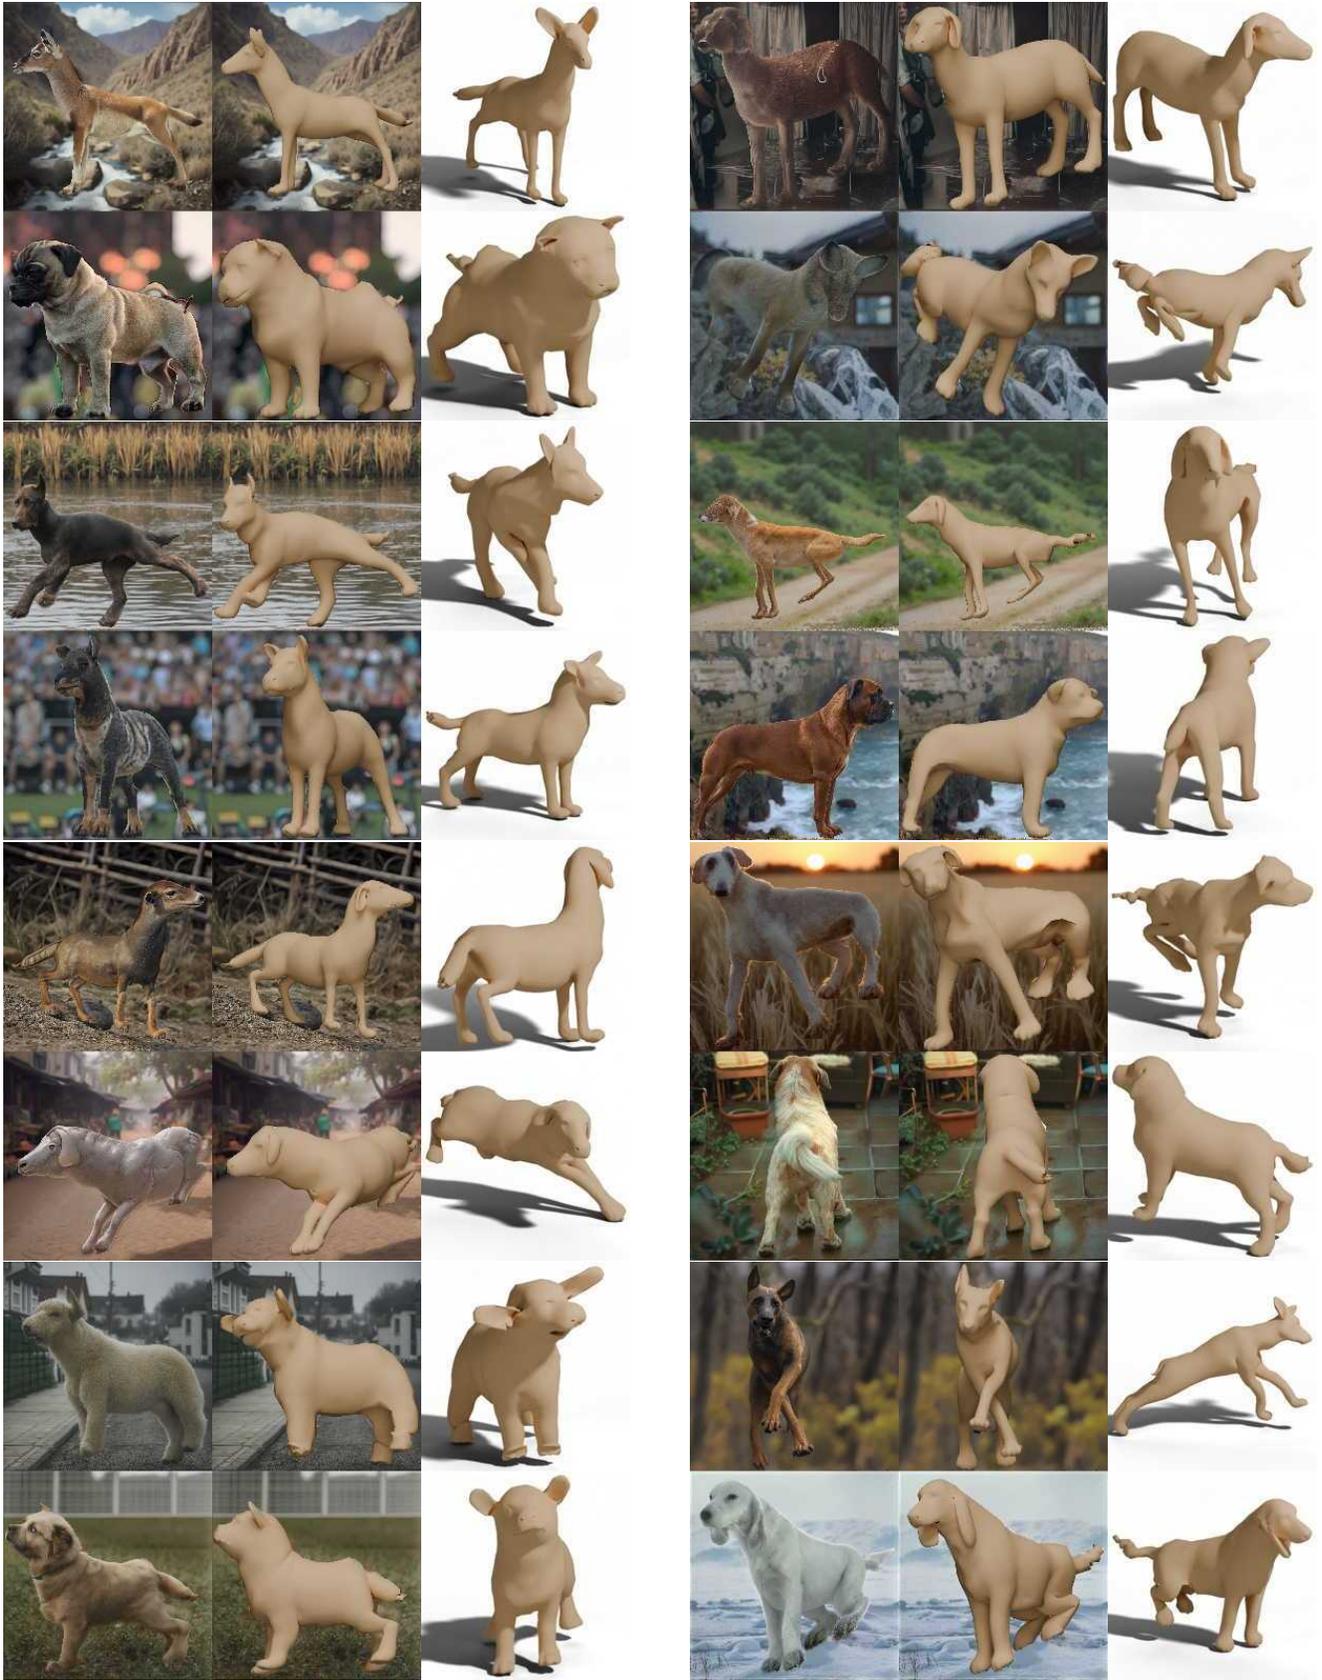

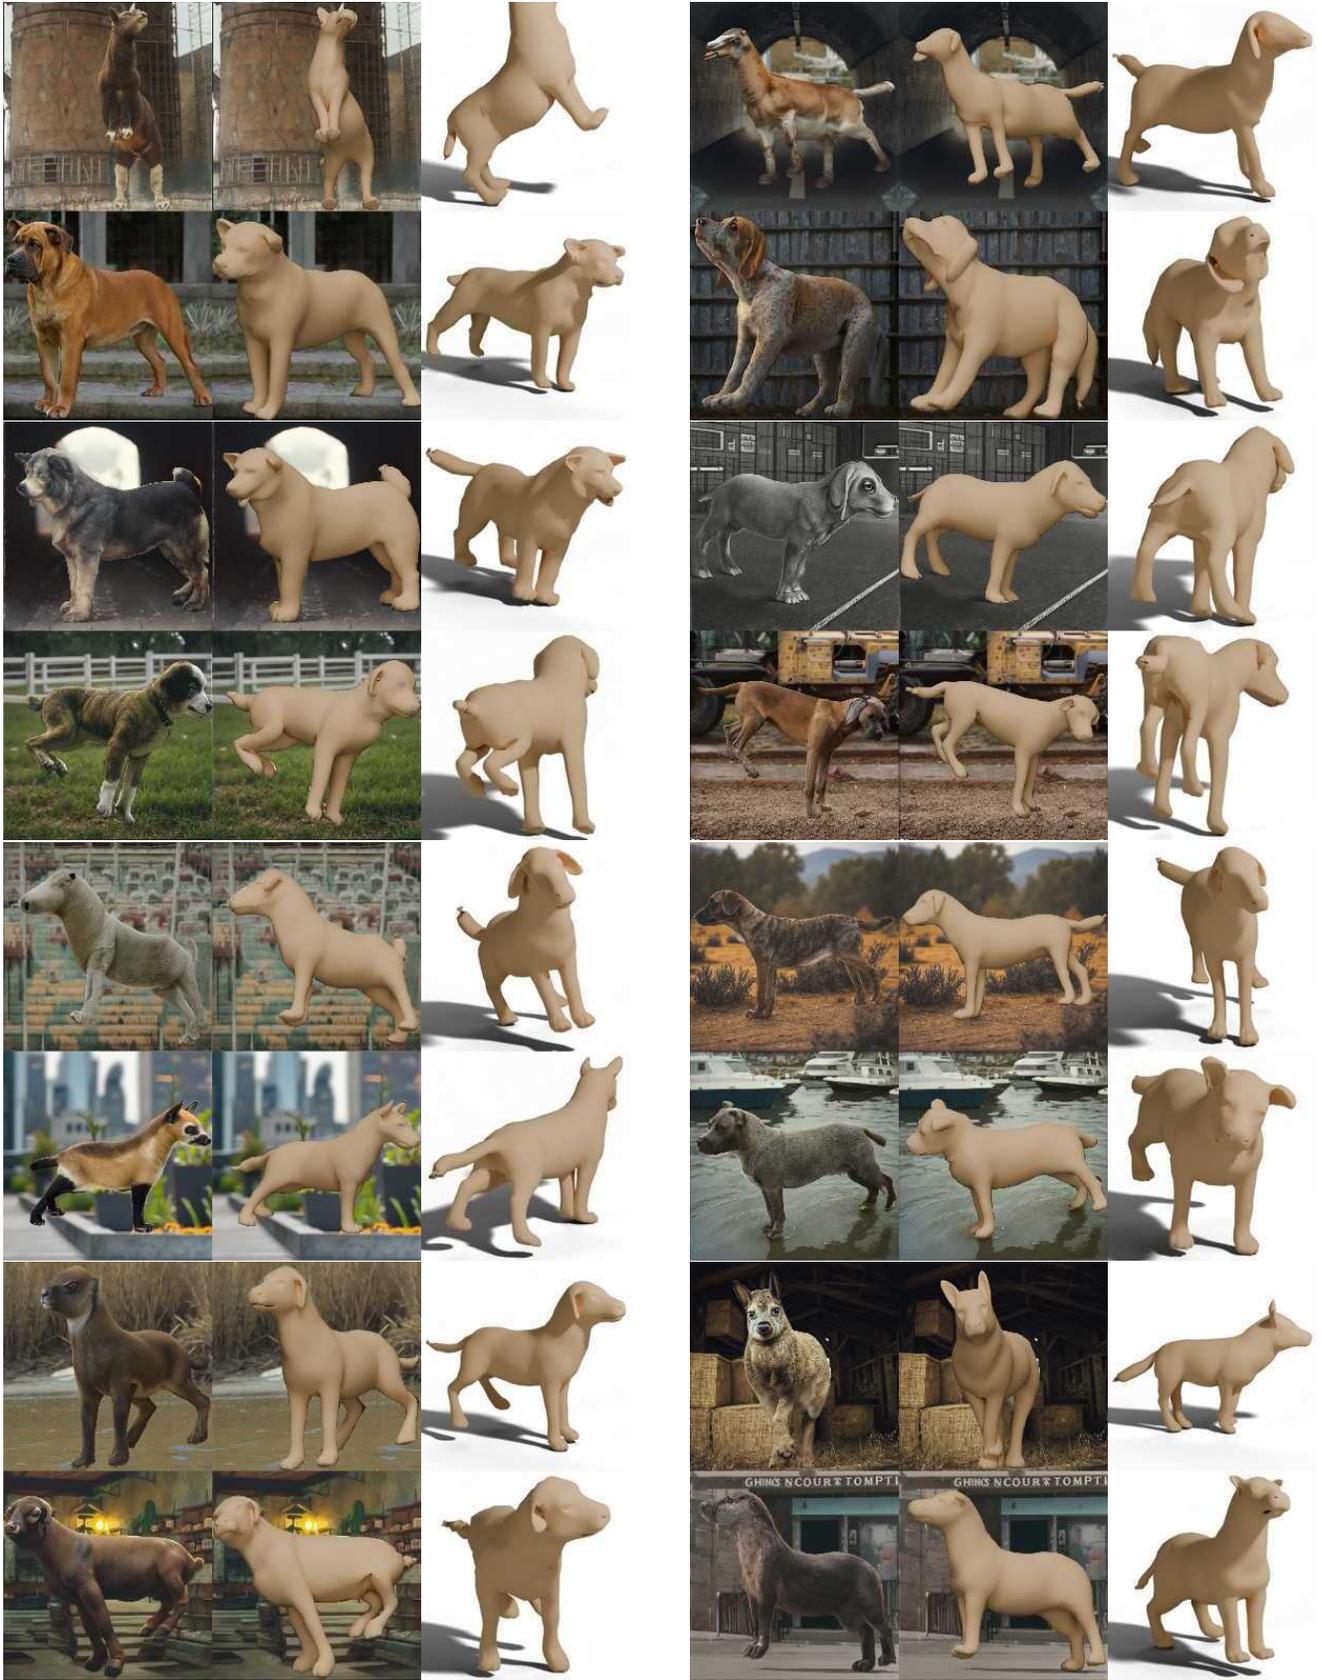

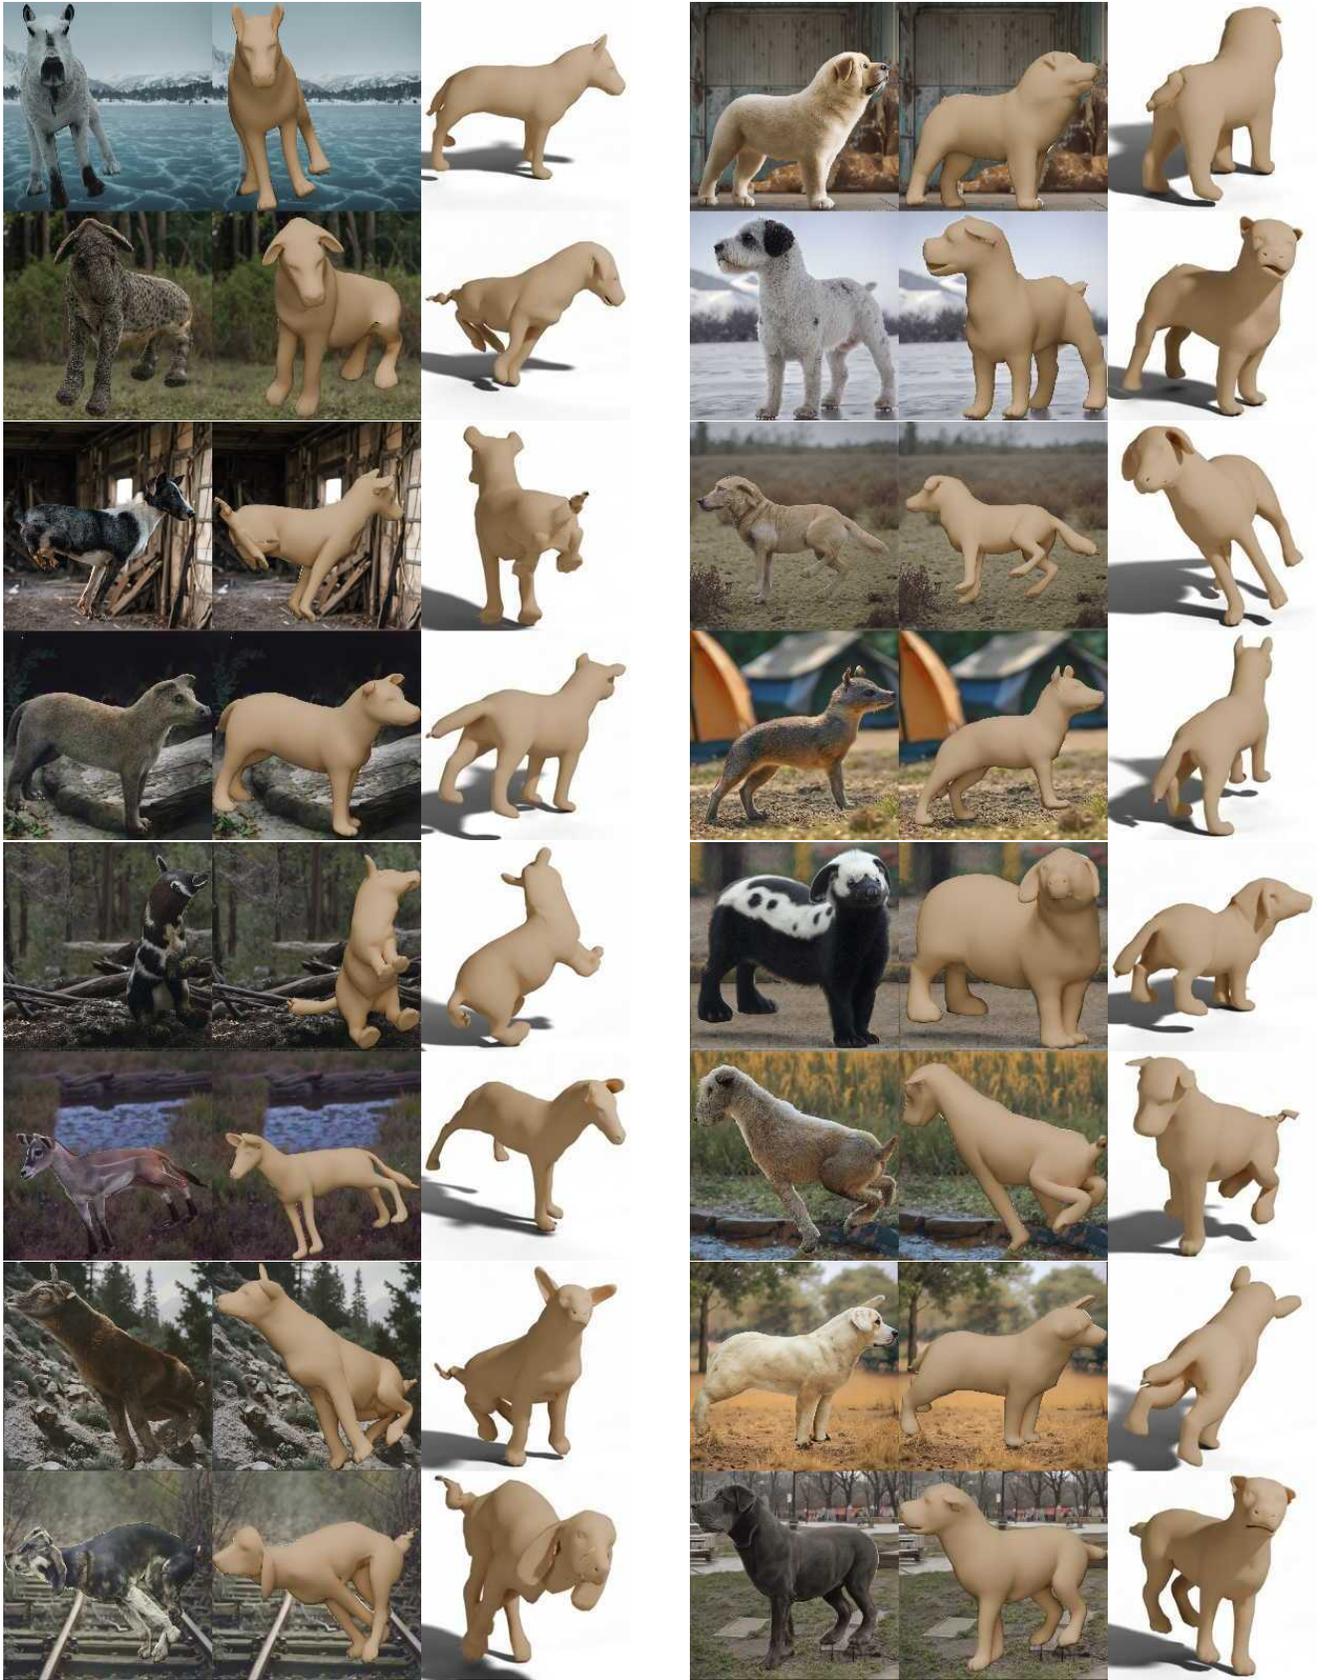

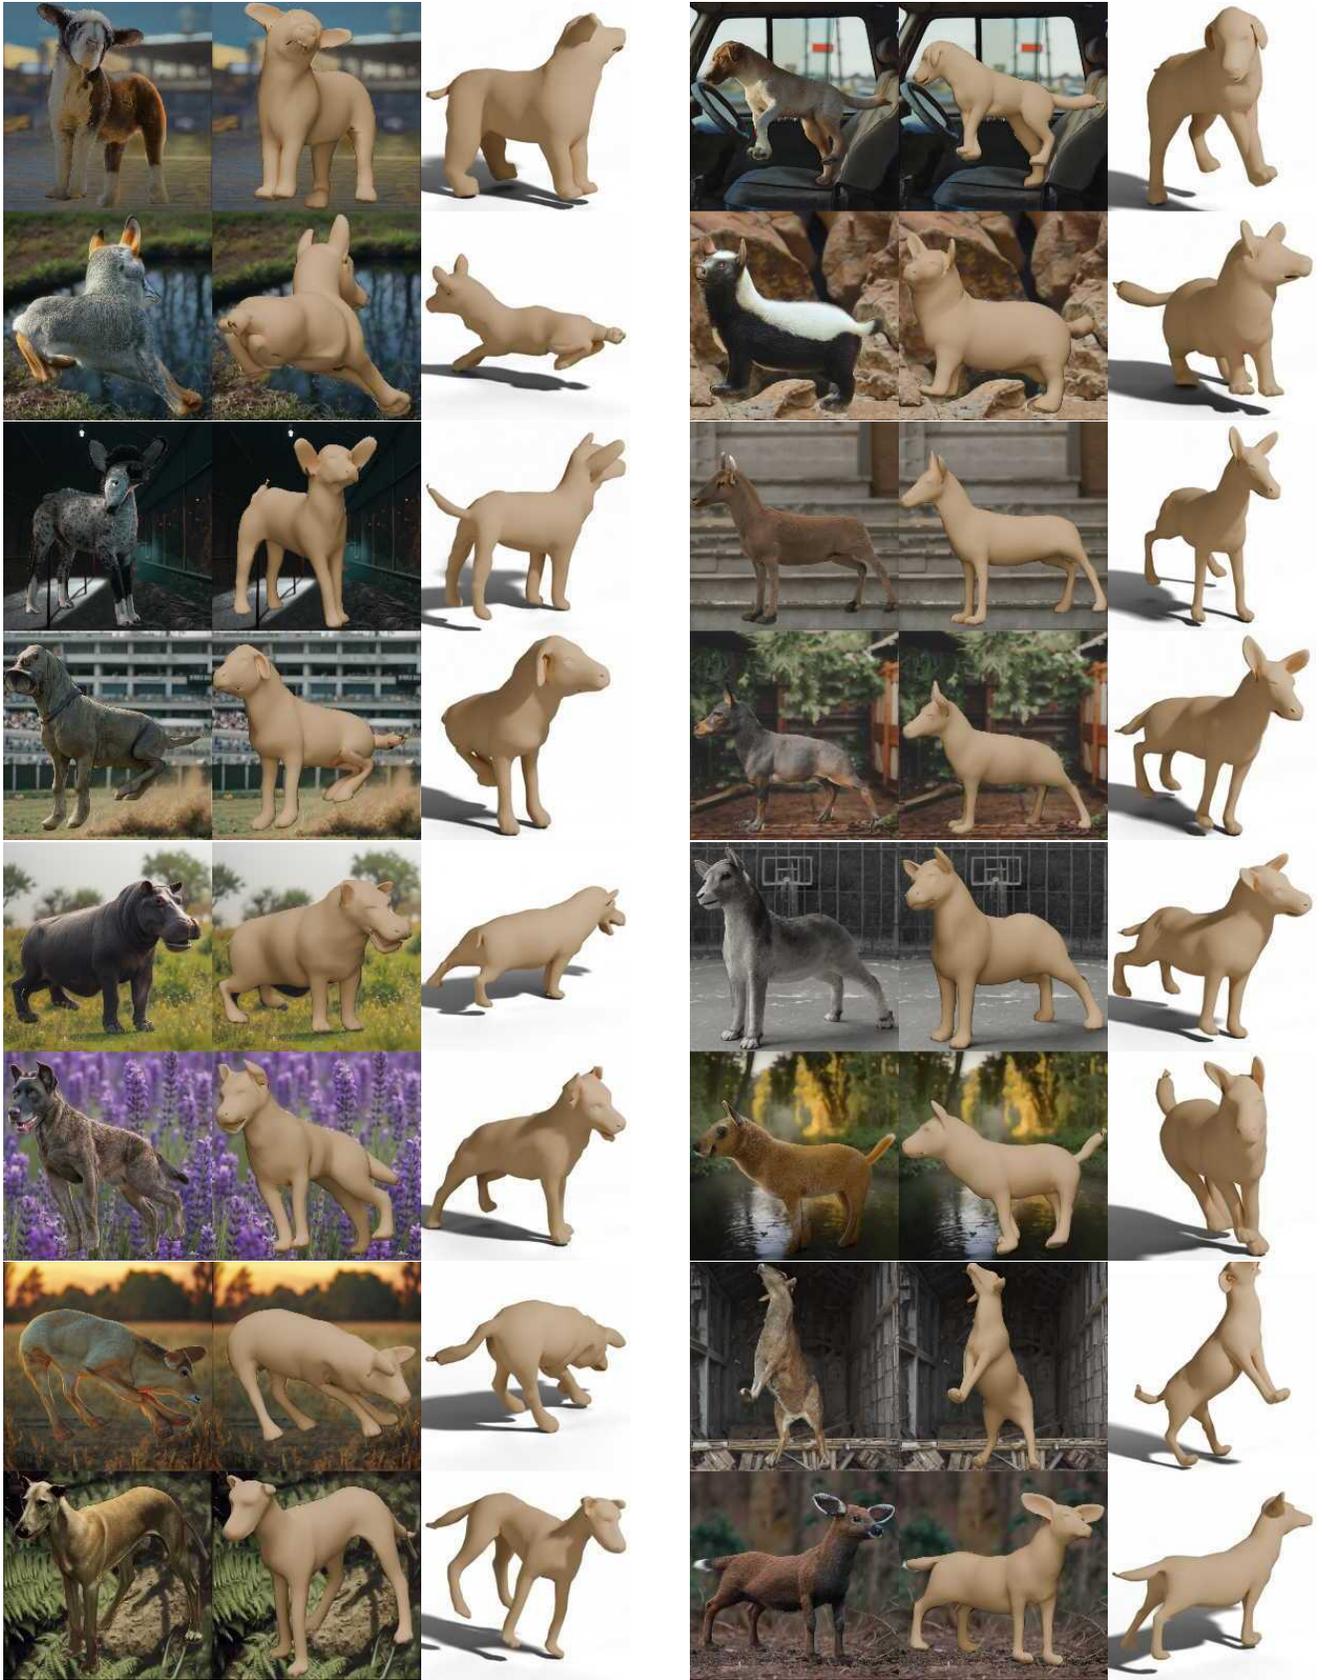

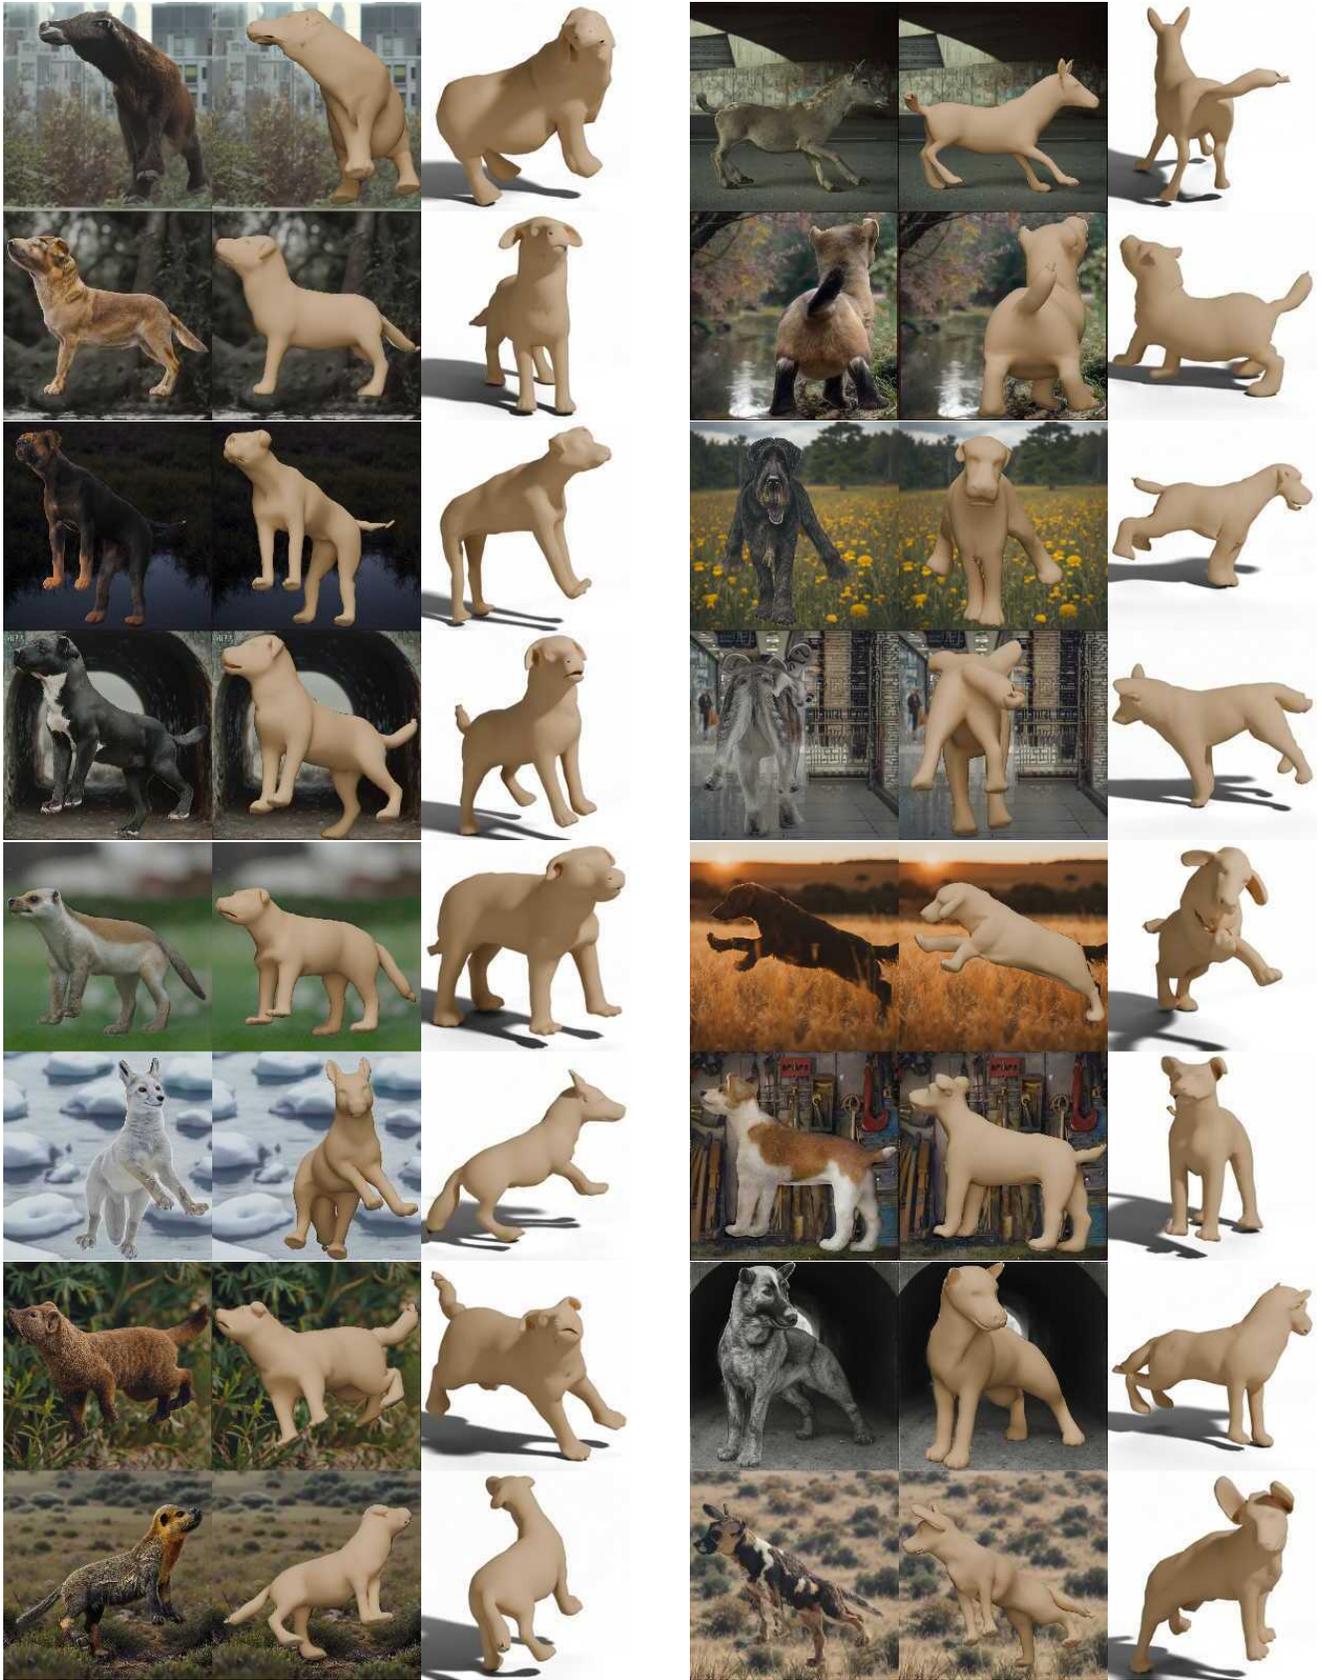

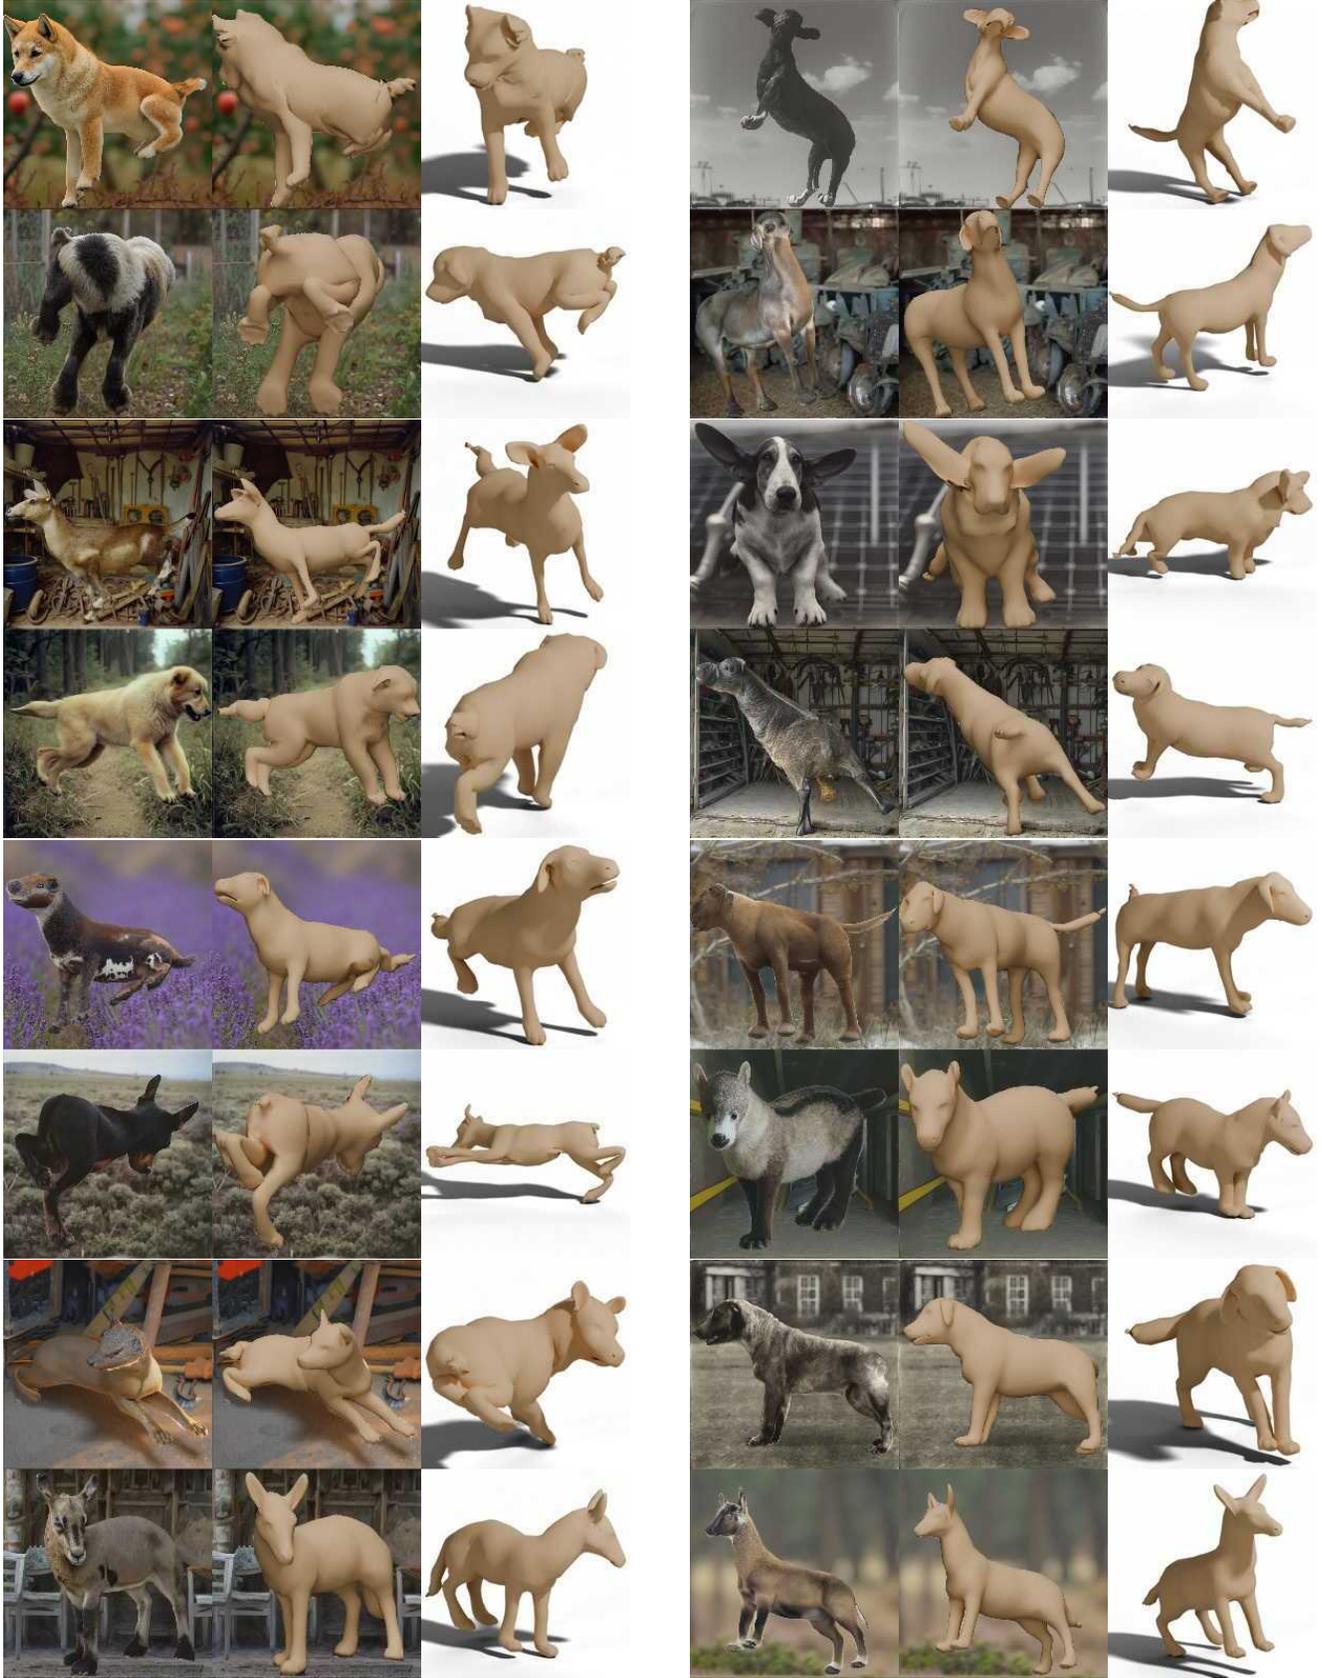

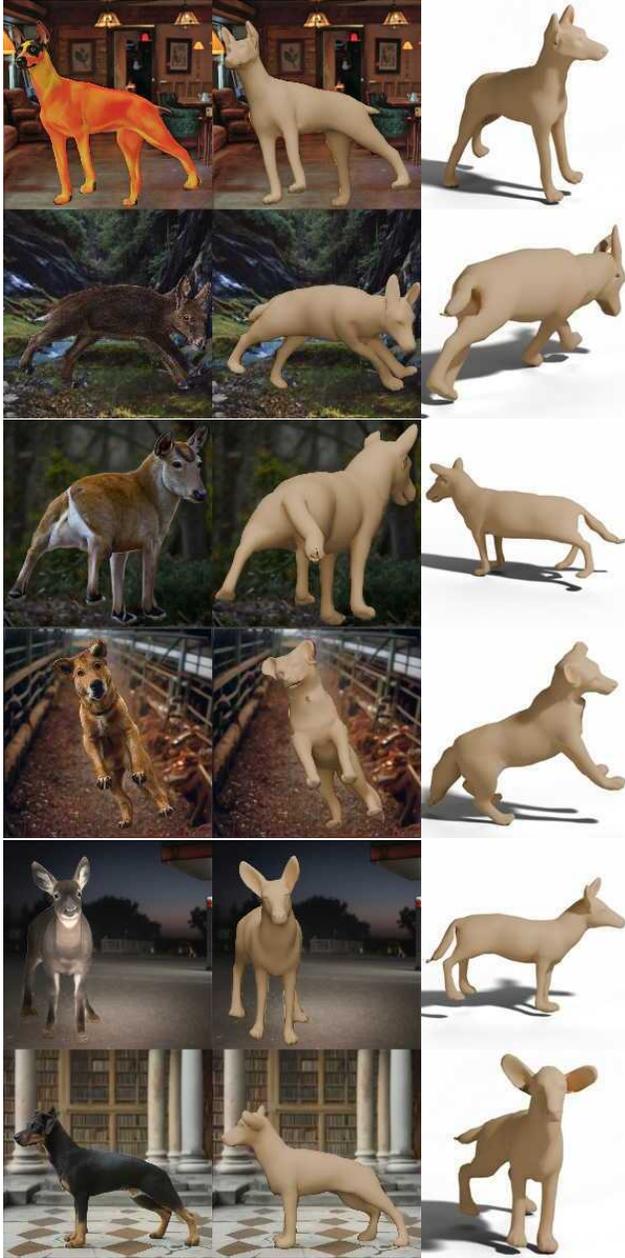

B. Additional Animal3D Results

We include reconstruction visualizations for the entire Animal3D dataset. In the images that follow, the ground-truth is shown in tan and the reconstruction in light blue. To better highlight inconsistencies, we also render each mesh at a rotation of 90 degrees.
